

Title: InTrust for Active Directory Administration

Description: This three-day course builds the basic skills and knowledge required to manage and support Quest InTrust for AD. Learn to configure and use Quest InTrust and InTrust for AD, including audit configuration, reporting, and monitoring capabilities. Hands-on activities, use-case scenarios and best practices are used to reinforce learning.

Audience: This class is designed for enterprise network and IT Security administrators tasked with compliance and security auditing of a Windows network infrastructure.

Objectives: Upon completion of this training, the student should be able to:

- Create site configurations for grouping similar computers to be audited/monitored.
- Gather and store event log information into one or more repositories.
- Create gathering schedules for geographically dispersed environments.
- Consolidate data from multiple repositories.
- Import event log data into an audit database following InTrust best practices.
- Generate audit reports from InTrust Knowledge Portal.
- Schedule automated report generation.
- Configure InTrust monitoring using the built-in monitoring rules and policies.
- Create custom monitoring rules and policies.
- Perform standard maintenance of InTrust repositories and databases.
- Install InTrust for AD components.
- Automate the deployment of InTrust for AD services.
- Configure Protected Objects.
- Generate InTrust for AD audit reports.
- Perform InTrust for AD specific monitoring.

Materials: In addition to the student lab guide, students will be able to download the following from the Quest virtual classroom site:

- InTrust Install Guide
- InTrust Quick Start Guide
- InTrust User Guide
- InTrust for AD Quick Start Guide
- InTrust for AD User Guide

Format: This class, including hands-on activities, is offered as:

- A private, instructor-led class taught at a customer's facility over 3 days.
- A private, web-based class taught in three 5-hour sessions via the Quest virtual classroom.
- A public, instructor-led class taught at a Quest classroom over 3 days.
- A public, web-based class taught in three 5-hour sessions via the Quest virtual classroom.
